FINTECH INDUSTRY SPEAKER SERIES

The Infrastructure for Next-Gen Blockchains

Featuring Ted Yin from Ava Labs

Ted Yin is the Chief Protocol Architect at Ava Labs. He received his Ph.D. from Cornell University, co-advised by Prof. Emin Gün Sirer and Prof. Robbert van Renesse. He also worked closely with Dr. Dahlia Malkhi. Ted focused more on fundamental problems of fault-tolerance, consensus protocols and peer-to-peer systems. His taste of research is to build the systems which are provably correct and practically effective. Currently, he is tackling challenges in blockchains from a system perspective.
